True or False? Open House challenges visitors March 26

Are robins a sign of spring? Do opossums hang upside down? Does an elephant ever forget? Come test your nature knowledge at the Discovery Center during an Open House on Sunday, March 26, from 1-4 PM. An interactive display will be available for you to see if what you know about nature is true or false.

All ages welcome to attend. This program and open house are free and no registration is required.

Oakwoods Nature Preserve's Richard S. "Doc" Phillips Discovery Center is located at 1400 Oakwoods Lane, off CR 144, west of Findlay. For more information about other upcoming park programs and events, view the HPD Seasonal Program & Event Guide at www.HancockParks.com under the "What's New?" section, visit our park "Calendar" or call the park office at 419-425-7275.
